## About Us

**Better Factories Cambodia (BFC)** operates in the Garment, Footwear and Bags and Travel Goods sector in Cambodia since 2001. The programme helps factories to improve relations between unions and management, make improvements on working conditions and help build capacity of factory staff on labour related issues.

At the factory level, BFC provides the following factory engagement models:

<b>Enterprise Assessments</b>	Enterprise assessments create a framework for assessing compliance with core international labour standards and national labour law, with the provision of recommendations to improve systems that will support proactive management and compliance. Since the start of the programme, this has been mandated by the government for all garment exporting producers in Cambodia, as well as for travel goods and bag factories.
<b>Advisory Services</b>	BFC's Enterprise Advisors (EAs) provide advisory services. EAs work directly with each factory to develop a Performance Improvement Consultative Committee (PICC) with both management and union/worker representatives. The EA guides the PICC in the development and implementation of an improvement plan, which addresses both non-compliance issues and management systems, through the development of social dialogue, following a 12-month cycle. While factories are responsible for creating and implementing improvement plans, advisory services ensure a tailored approach that provides direction and capacity building.
<b>Training Services</b>	Training courses support assessment and advisory services with a strong focus on building capacity and ensuring enterprise engagement in the long term. Targeted factory floor and classroom-based instruction gives participants the chance to identify issues of concern, learn from the experience of others in the industry and find practical solutions for themselves. Training topics range from ILO core labour standards and workers' rights and responsibilities to human resources management, supervisory skills and occupational safety and health, among others.

All BFC services are available for factories operating in the sector. The pricing of its services for 2026 are set out in this document and vary depending on whether the factory is an exporting garment, footwear or bags and travel goods factory.
